### REASONS FOR ALLOWANCE

1. At the outset, the Examiner apologizes for the advisory action mailed on 2/11/08. The Examiner inadvertently reviewed an earlier version of the claims before taking action. The Examiner appreciates that Applicant's representative pointed this out.
2. Claims 1-6, 8-14, 16-17, and 34-36 are allowed.
3. The following is an examiner's statement of reasons for allowance: The prior art, ("Hankin") (AU 199944623 B2), discloses a system for remotely enabling a pool table having a console located near the pool table having a payment mechanism and a wireless communication capability, a pool table that communicates with the console via a wireless or wired network connection to control a ball release to permit play upon obtaining a predetermined payment. Moreover, Hankin discloses powering such system with standard power sources. Hankin does not disclose, teach, or fairly suggest alone or in combination, a pool table system that allows a user to play pool upon receipt of a playing fee, wherein one or both of said remote activation assembly and/or said activation-sensing unit further comprises an antenna that wirelessly receives power signals from a commercial radio station, wherein the received power signals power one or both of said remote activation assembly and/or said activation-sensing unit as recited in claim 1 and similarly recited in claims 10 and 34. The instant invention is deemed to be an improvement over the prior art. One reason is because typical pay-for-play pool tables only include a coin acceptor, but not a bill acceptor. This is because the use of a bill acceptor requires increased power and space. One of the obstacles to providing power to such bill acceptors is that most pool tables require unobstructed access from all sides of the table for game play. Further, a pool table usually requires a generous amount of floor space surrounding a table

for game play. Electrical wires or cabling passing from the pool table to a wall outlet are obtrusive and pose tripping problems. Thus, the instant invention provides a pool table system allowing unobstructed access from all sides of the table for game play without the hazards of tripping on wires or cabling passing from the pool table to a wall activation system or power source.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

#### ***Drawings***

5. Corrected drawing should be submitted having uniform lines and text throughout the drawings.
6. In order to avoid abandonment of this application, correction is required in reply to the Office action. The correction will not be held in abeyance.
